SANITARY LIFTS

PALLET TRUCKS

Electric Pallet Truck

Capacities 4,500 lbs | 5,500 lbs | 6,500 lbs

The **SUPERLIFT Electric Pallet Truck** enhances productivity, reduces manual labor, and ensures safety in demanding material handling environments. This easy to operate pallet truck with 4,500-5,500 and 6,500 lbs capacities is a powerful piece of material handling equipment designed to transport heavy pallets efficiently in warehouses, distribution centers, and manufacturing facilities.

Features

- **Multifunctional handle:** Multifunctional handle imported from Germany equipped with an emergency reverse button to protect the operator against injury in the event of an accident.
- **Safety protection:** The soft PU armrest features a superior resistance to compression and impact, reducing indirect hits and injury during stacker movement. This provides safety protection and comfort for the operators.
- **Safety switch:** The power can be rapidly cut off in an emergency.
- **Side loading & unloading of storage battery:** Easy change of batteries, users can select among different brands.
- **AC drive:** The maintenance free AC drive motor has no carbon brush, no contacts, a large torque and large output power. It uses a rear axle drive, providing perfect power and gradeability.
- **Lifting height limit:** The lifting height can be precisely controlled to reduce energy waste.
- **Multifunctional meter:** A multifunctional meter can display integrated electricity quantity, working time and failure codes. The operators can know the running condition of the stacker via the meter.
